

EFEITO DO DISTÚRBIO NAS ESTRATÉGIAS DE VIDA

DINÂMICAS ECOLÓGICAS E EVOLUTIVAS

Luísa Novara Monclar Gonçalves

ORIENTADOR: Prof. Dr. Alexandre Adalardo de Oliveira

COORIENTADOR: Prof. Dr. Paulo Inácio Prado

# heterogeneidade interespecífica de estratégias

## Queda na diversidade:

- Maiores chances de **morte de populações inteiras** por distúrbio
- Redução nos tamanhos populacionais:
  - **Exclusão competitiva mais rápida**
  - Efeito da **deriva ecológica** no mesmo sentido

# cenários

# mutação

# cenários

# mutação

- é o único processo de entrada de variação (vs. exclusão competitiva e seleção e vs. deriva)

# cenários

# mutação

- é o único processo de entrada de variação (vs. exclusão competitiva e seleção e vs. deriva)
- cria novas estratégias e pode resgatar estratégias extintas ou quase extintas

# cenários

# mutação

- é o único processo de entrada de variação (vs. exclusão competitiva e seleção e vs. deriva)
- cria novas estratégias e pode resgatar estratégias extintas ou quase extintas
- permite resposta contínua às pressões variadas ao longo do tempo

# cenários

# cenários

# cenários

# interação eco-evo

# cenários

# interação eco-evo

- entrada de variação por mutação
- competição entre linhagens isoladas (espécies diferentes)

# cenários

# interação eco-evo

- entrada de variação por mutação
- competição entre linhagens isoladas (espécies diferentes)
- coexistência de estratégias distintas mediadas por distúrbio

## Ecologia

- desconsidera adaptação
- possíveis consequências:
  - gerar previsões erradas
  - relacionar padrões a processos equivocados

# cenários

ainda assim...

## Ecologia

- desconsidera adaptação
- possíveis consequências:
  - gerar previsões erradas
  - relacionar padrões a processos equivocados

## Biologia Evolutiva

- desconsidera contexto multiespecífico
- possíveis consequências:
  - não acessar padrões que emergem em escalas maiores
  - limitar-se a escalas que não explicam a maior parte da diversidade

# cenários

- 
- 
-

# conclusões

- efeito do distúrbio nas estratégias de vida é diferente comparando dinâmicas ecológicas e evolutivas
- 
-

# conclusões

- efeito do distúrbio nas estratégias de vida é diferente comparando dinâmicas ecológicas e evolutivas
- há padrões que emergem apenas em dinâmicas eco-evolutivas
-

# conclusões

- efeito do distúrbio nas estratégias de vida é diferente comparando dinâmicas ecológicas e evolutivas
- há padrões que emergem apenas em dinâmicas eco-evolutivas
- o distúrbio deve ser estudado em dinâmicas eco-evolutivas, na interface entre Biologia Evolutiva e Ecologia

## Queda na diversidade:

- O aumento do distúrbio, ainda que possa prejudicar o melhor competidor anterior, cria uma nova condição, em que outra estratégia passa a ser melhor competidora
- Quanto maior o distúrbio, mais **rápida** é a perda de espécies por deriva ecológica e por exclusão competitiva
